Dhanushdigisol

04/2024 - Present

Ahmedabad

Serving Quality with Technology" Web Development | Mobile Application | UI/UX ~ Leading Software Development Company

Achievements/Tasks

- Designed, developed, and maintained dynamic web applications using PHP, ensuring smooth integration with front-end components and databases.
- Developed and integrated RESTful APIs to enhance the functionality of web applications, improving data exchange and third-party service integration.
- Conducted thorough testing and debugging of PHP code to identify and resolve performance issues, bugs, and errors in live production environments.

PERSONAL PROJECTS

Bus Booking (06/2023 - 12/2023)

- Bus Search and Ticket Booking** Developed a user-friendly platform that allows users to search for available buses, view schedules, and book tickets based on their travel preferences .
- Integrated Razorpay Payment Gateway** Implemented Razorpay payment gateway to facilitate secure and seamless online transactions for ticket bookings, providing users with multiple payment options .
- Real-time Availability and Booking Confirmation** Designed real-time bus availability and booking confirmation features, ensuring accurate seat reservations and timely notifications to users upon successful bookings.
- Admin Dashboard for Bus Management** Built an admin dashboard for bus operators to manage bus schedules, seat availability, and booking history, improving operational efficiency.
- User Authentication and Profile Management** Incorporated user authentication with secure login and profile management features, allowing users to view booking history, manage preferences, and track ticket status.

SCHOOL MANAGEMENT (04/2024 - 06/2024)

- Database Design:** Learn to create relational databases with proper normalization.Understand relationships between tables (one-to-many, many-to-many).
- Backend Development:** Gain hands-on experience in CRUD operations using PHP and MySQL.Understand secure coding practices like prepared statements to prevent SQL injection.
- Authentication and Authorization:** Implement secure login systems and role-based access controls.
- API Development:** Create RESTful APIs and understand token-based authentication.
- Frontend-Backend Interaction:** Build responsive interfaces and connect them to backend systems.
- Version Control:** Learn to use Git for version management and collaboration.
